Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to because the hatching lines of the cross-sectional view do not use proper lines for representing different materials. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: “160” in Figure 1. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate

prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: In the paragraph [0017], line 5, "upper end 131" should be -- front end 131 --.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Okayasu et al (6,364,692 B1).

Okayasu discloses a connector comprising a receptacle 10 and a plug 20. The receptacle 10 comprises a housing 12 having a mating face, a contact 15, a terminal position assurance (TPA) member 40, and a gel 30. The housing 12 includes inner and outer shells separated by a gap and multiple chambers 13 for holding contacts 15 (see Fig. 2). The TPA member 40 is

Art Unit: 2839

mounted over the contacts 15 and has openings 43 aligned with the contacts 15. The gel 30 is sandwiched between the TPA member 40 and the inner shell (dielectric member). The housing 12 also includes rear openings for receiving wires W and annular seal 18 for surrounding the wires to form watertight seals between wires and the receptacle 10. The plug 20 comprises a housing 22 and contacts 23. When the plug 20 is mated with the receptacle 10, the housing 22 of the plug 20 envelops the inner shell of the receptacle 10. The contacts 23 of the plug 20 pass through the gel 30 and mate with the contacts 15 of the receptacle 10. When the plug 20 is removed, the slits formed in the gel 30 by the contacts 23 of the plug 20 close to re-seal the contact 15 of the receptacle 10.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent No. 3,972,581 by Oldham, US Patent No. 4,425,017 by Chan, US Patent No. 5,639,992 by Debbaut, and US Patent No. 5,975,945 by Daoud.
